The month view, as it runs today

১ **Traditional reckoning, done right**

Solar months begin when the sun enters each rashi; tithis are taken at local sunrise, night pujas at midnight. Every date shows how it was worked out.

২ **Festivals already in place**

Bohag, Kati and Magh Bihu, Uruka, Raas Purnima, Doul Jatra, the Tirobhav Tithis of Srimanta Sankardeva and Sri Sri Madhavdeva, and the major pujas.

৩ **Your observances, recurring the old way**

Add melas, namghar gatherings or a remembered tithi that repeats by Bhaskarabda date or lunar tithi. Bulk-load from an Excel template; send to Google, Apple or Outlook calendars.

৪ **Works where the signal doesn't**

Install it once from the browser and it runs offline. No accounts, no sign-ups — each person's events stay on their own phone.

৫ **Host it as your own**

A small folder of files: put it on your website, GitHub Pages or Netlify and share one link with your members.
