DrawGeo

Field mapping for the places that hold our history

26°11′ N
91°44′ E
WGS 84

Map what your heritage stands on.

Draw the boundary of a temple compound, walk a heritage trail with GPS, and keep every site's record beside its shape. On any phone or laptop, with no server and no account.

site	area_m2	condition
Temple compound	1,812	Good
Temple tank	964	Fair
Sacred grove	2,436	At risk
Sum	**5,212**	3 sites

Illustration: a village heritage survey as you might draw it in DrawGeo.

01

Measured on the ellipsoid

Lengths, areas and bearings worked out on WGS 84, with every side of a boundary listed for your report.

02

Straight from the field book

Type corners in as latitude and longitude, or as distance and bearing from the last point, for traverse surveys.

03

GPS you can stand behind

Record walks, and average up to 120 readings into one point with its spread and accuracy saved alongside.

04

A site register, not just a map

An attribute table with dates, totals and calculated fields in hectares, acres or bigha. Colour sites by condition.

05

Opens in any GIS

Export GeoJSON, KML, Shapefile, GeoPackage, CSV or GPX for QGIS, Google Earth or a government portal.

06

Your data stays yours

Runs in the browser, installs like an app, and keeps projects on your device. Back them up to a single file.

PUT ON THE MAP

Monument boundaries · Sacred groves · Temple tanks and ponds · Namghars and satras · Heritage trails · Encroachment checks · Old village layouts

Survey your sites with us.

Free for heritage societies, namghars, schools, cultural trusts and village committees. We'll help your team set it up and start mapping.
