FOR HERITAGE NGOS & COMMUNITY ORGANISATIONS

Free web app · v9.0.0

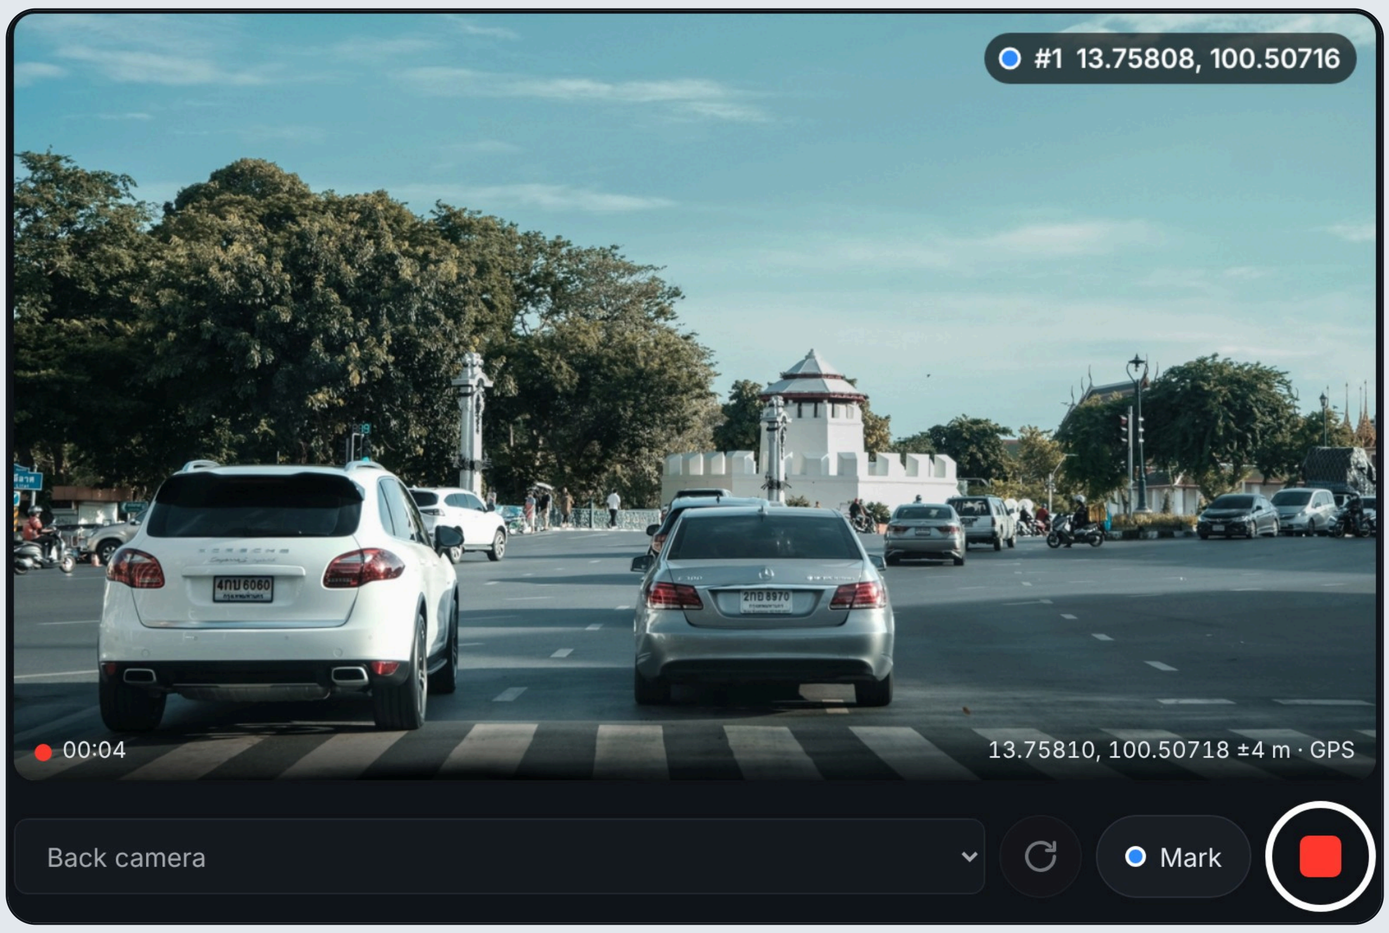

GeoCam

Video and GPS, recorded together

REC

Film the site. Keep the where and the when.

GeoCam records video and a GPS track side by side, so every moment of footage knows exactly where it was taken.

The real app recording beside a historic fort, and the saved recording

ONE WALK, TWO FILES

`geocam-….mp4`
The video, framed 16:9. Each marker's dot and coordinates show on screen for five seconds.

`geocam-….geojson`
The route as a GPS line, every point tied to its second in the video, plus each marker as a point. Opens in DrawGeo or QGIS.

Save both to a folder, or share them straight to WhatsApp or Drive.

01

Mark what matters

Tap Mark at an inscription, a crack or a boundary stone: its coordinates are stamped on the video and saved as a point.

02

Made for the field

Works without internet; GPS needs only open sky. Mobile-network location can fill in where GPS is weak, and the screen stays awake.

03

Nothing is lost

Every second is written to the phone as it records, so an interrupted recording can be recovered. Nothing is uploaded.

USE IT FOR

Walk-through records of monuments · Condition visits and before-and-after checks · Heritage trail videos · Festivals and rituals filmed in place · Evidence of encroachment or damage

Document your sites with us.

Free for heritage societies, museums, schools, cultural trusts and village committees. We'll help your team plan field walks and bring the tracks into DrawGeo.
