FOR HERITAGE NGOS & COMMUNITY ORGANISATIONS

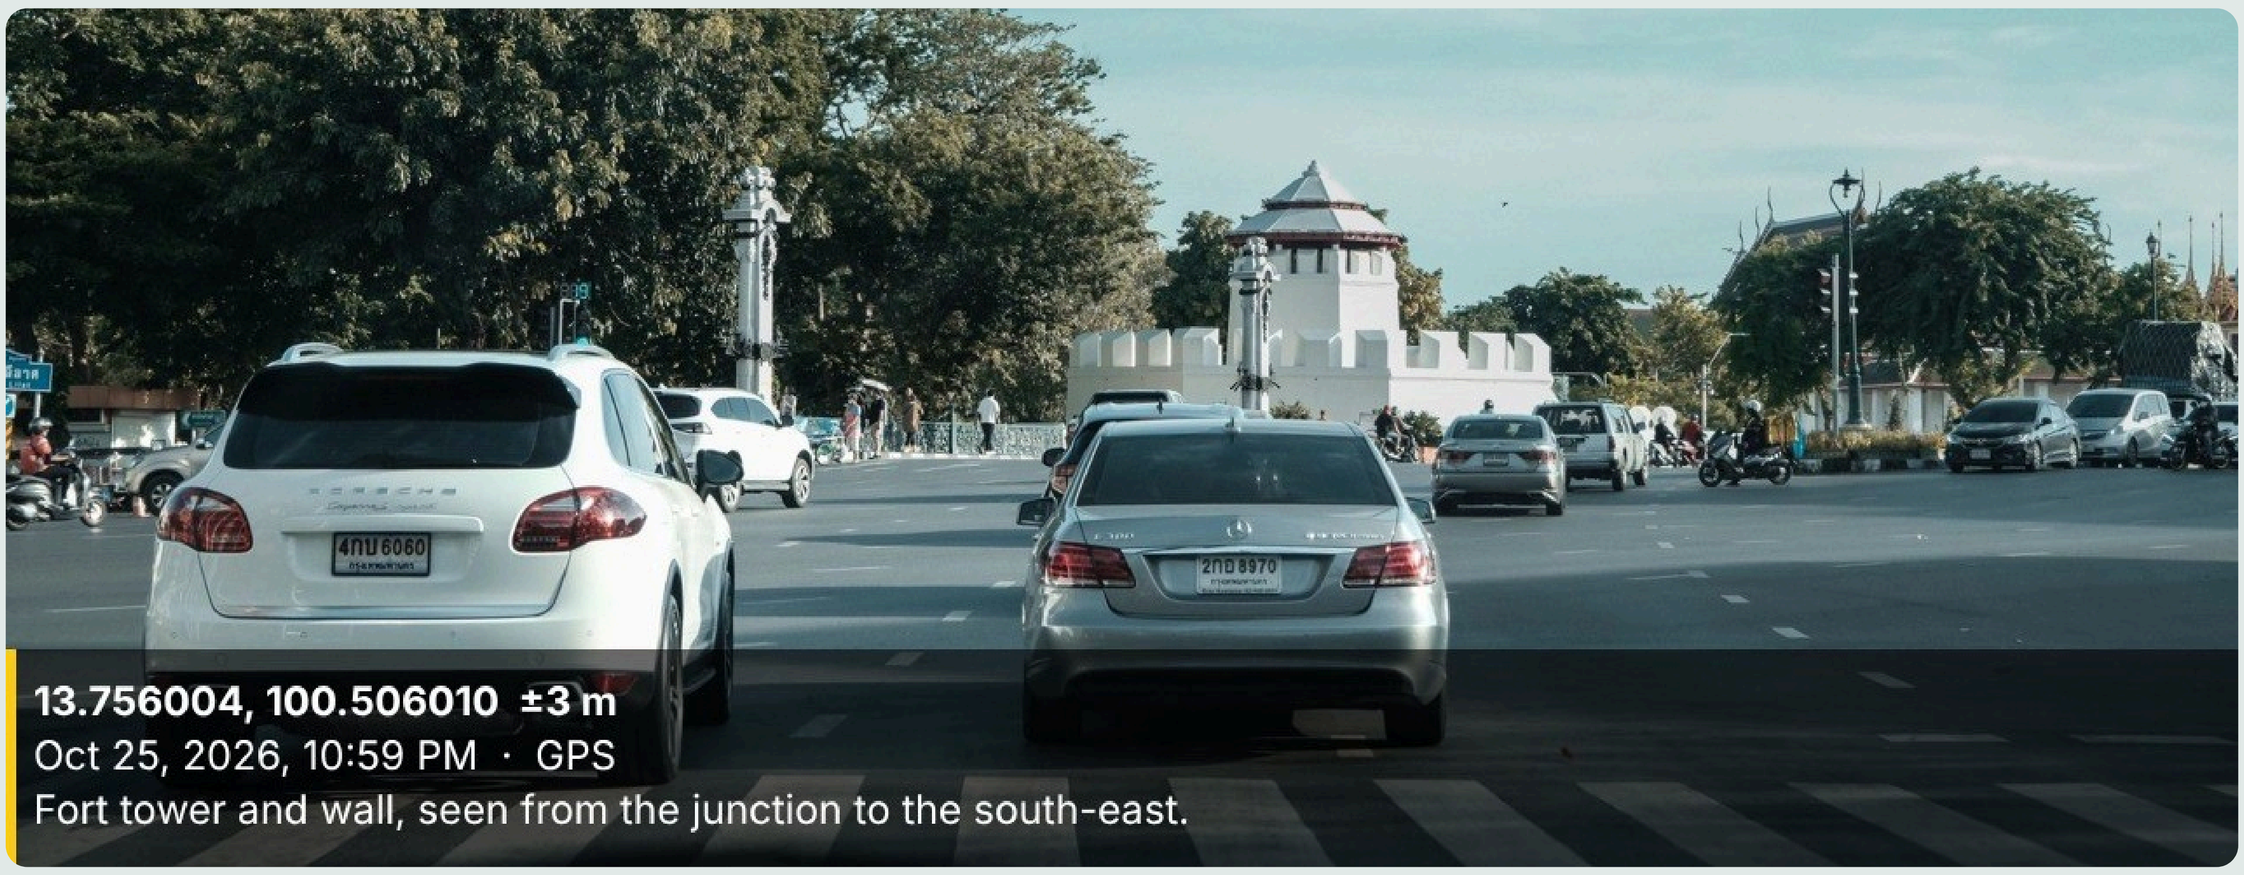

Free web app · v2.1.1

GeoTag

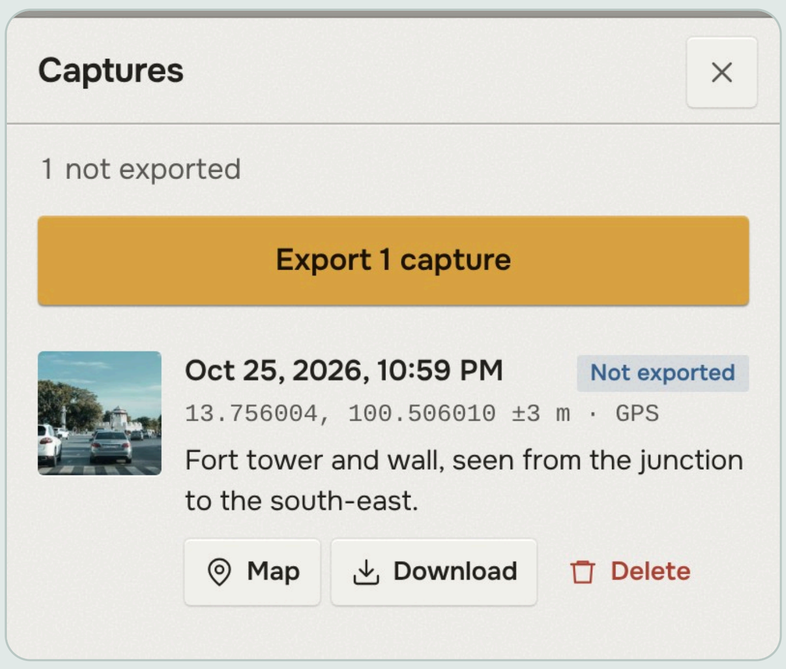

Site photos that know where they were taken

Every photo, pinned to its place.

Take a photo, add what you saw, and GeoTag keeps the exact spot and time with it — on the photo, inside the file, and in a table you can map.

A real GeoTag photo: coordinates, time and the note are stamped along the bottom and written into the file

Captures wait on the phone until you export them

01 Accurate, or it waits

Save stays off until GPS is as accurate as you ask, from ±10 m. Gallery photos keep their own location.

02 Works with no signal

Captures save offline and stay on the phone. Nothing is uploaded.

03 One export, every format

The photos plus **captures.csv** for Excel, **.geojson** for QGIS or DrawGeo and **.kml** for Google Earth — to a folder, a ZIP, or WhatsApp.

USE IT FOR

Heritage site inventories · Condition and damage reports · Inscriptions, sculptures and old trees · Volunteer survey days · Before-and-after records of repairs

Start your site inventory with us.

Free for heritage societies, museums, schools, cultural trusts and village committees. We'll help your volunteers capture their first sites and map the results.
