FOR HERITAGE NGOS & COMMUNITY ORGANISATIONS

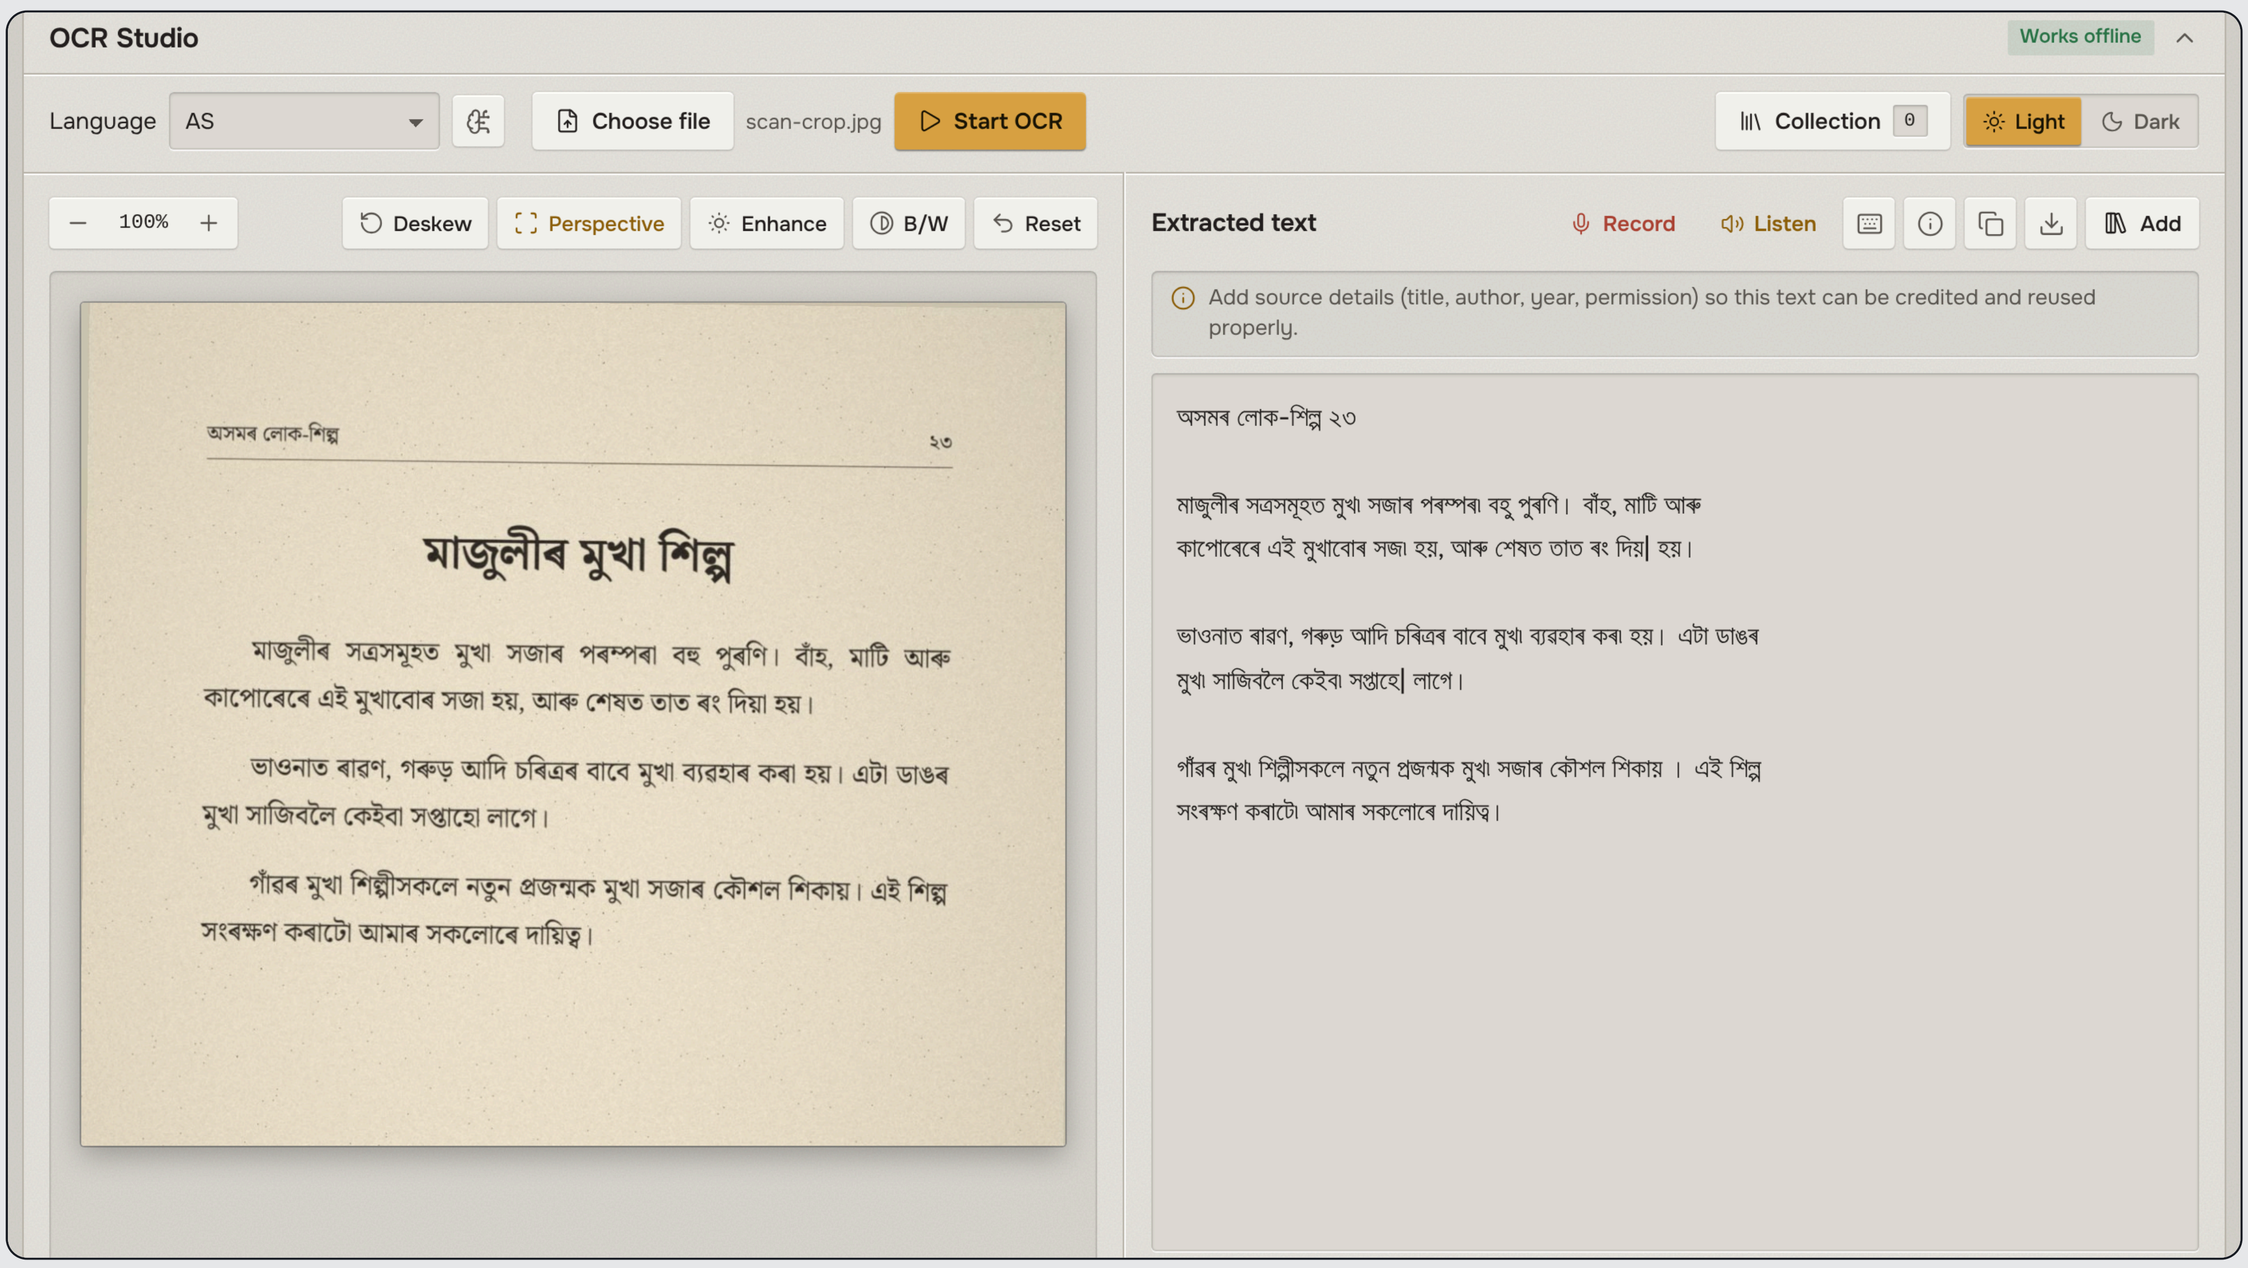

Free web app · v3.0.0

OCR Studio

Turn printed pages into text you can search, credit and keep

Old books, read again — in their own script.

Photograph or scan a page and OCR Studio reads Assamese, Bengali and English text from it. It runs in the browser, works offline, and nothing is uploaded.

A sample Assamese page and OCR Studio's first reading of it, ready to proofread

01

Proofread, then save

Correct the text beside the page, then save a text file or a searchable PDF that carries your corrected words.

02

Credit every source

Title, author, year, publisher and permission go with each page, and "Community use only" pages are marked.

03

Build a language corpus

Collect pages, record a reader, and export the text, one PDF per book, and training lines for your own model.

USE IT FOR

Digitising old books and magazines · Searchable village and namghar archives · Text for endangered-language corpora · Training OCR models for any language written in the Eastern Nagari script

Bring your printed heritage online with us.

Free for heritage societies, libraries, language groups, schools and village committees. We'll help your team digitise its first book.
